1. A SAFETY INFORMATION

Before the installation and use of the appliance, carefully read the supplied instructions. The manufacturer is not responsible for any injuries or damage that are the result of incorrect installation or usage. Always keep the instructions in a safe and accessible location for future reference.

1.1 Children and vulnerable people safety

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning the use of the appliance in a safe way and understand the hazards involved. Children of less than 8 years of age and persons with very extensive and complex disabilities shall be kept away from the appliance unless continuously supervised.
- Do not let children play with the appliance and mobile devices with My AEG Kitchen.
- Keep all packaging away from children and dispose of it appropriately.
- WARNING: Keep children and pets away from the appliance when it operates or when it cools down. Accessible parts become hot during use.
- If the appliance has a child safety device, it should be activated.
- Children shall not carry out cleaning and user maintenance of the appliance without supervision.

1.2 General Safety

- Only a qualified person must install this appliance and replace the cable.
- WARNING: The appliance and its accessible parts become hot during use. Care should be taken to avoid touching heating elements.

- Always use oven gloves to remove or put in accessories or ovenware.
- Before carrying out any maintenance, disconnect the appliance from the power supply.
- WARNING: Ensure that the appliance is switched off before replacing the lamp to avoid the possibility of electric shock.
- Do not use the appliance before installing it in the built-in structure.
- Do not use a steam cleaner to clean the appliance.
- Do not use harsh abrasive cleaners or sharp metal scrapers to clean the glass door since they can scratch the surface, which may result in shattering of the glass.
- If the mains power supply cable is damaged, it must be replaced by the manufacturer, its Authorised Service Centre or similarly qualified persons to avoid an electrical hazard.
- Do not activate the appliance when it is empty. Metal parts inside the cavity can create electric arcing.
- Metallic containers for food and beverages are not allowed during microwave cooking. This requirement is not applicable if the manufacturer specifies size and shape of metallic containers suitable for microwave cooking.
- WARNING: If the door or door seals are damaged, the appliance must not be operated until it has been repaired by a qualified person.
- WARNING: Only a qualified person can carry out any service or repair operation that involves the removal of a cover which gives protection against exposure to microwave energy.
- WARNING: Do not heat liquids and other foods in sealed containers. They are liable to explode.
- Use only utensils that are suitable for use in microwave ovens.
- When heating food in plastic or paper containers, observe the appliance due to the possibility of ignition.

- The appliance is intended for heating food and beverages. Drying of food or clothing and heating of warming pads, slippers, sponges, damp cloth and similar may lead to risk of injury, ignition or fire.
- If smoke is emitted, switch off or unplug the appliance and keep the door closed in order to stifle any flames.
- Microwave heating of beverages can result in delayed eruptive boiling. Care must be taken when handling the container.
- The contents of feeding bottles and baby food jars shall be stirred or shaken and the temperature checked before consumption, in order to avoid burns.
- Eggs in their shell and whole hard-boiled eggs should not be heated in the appliance since they may explode, even after microwave heating has ended.
- The appliance should be cleaned regularly and any food deposits removed.
- Failure to maintain the appliance in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

2. SAFETY INSTRUCTIONS

2.1 Installation

Only a qualified person must install this appliance.

- · Remove all the packaging.
- · Do not install or use a damaged appliance.
- Follow the installation instructions supplied with the appliance.
- Always take care when moving the appliance as it is heavy. Always use safety gloves and enclosed footwear.
- Do not pull the appliance by the handle.
- Install the appliance in a safe and suitable place that meets installation requirements.
- Keep the minimum distance from other appliances and units.
- · Before mounting the appliance, check if the oven door opens without restraint.
- The appliance is equipped with an electric cooling system. It must be operated with the electric power supply.
- The built-in unit must meet the stability requirements of DIN 68930.

Cabinet minimum height (Cabinet under the work- top minimum height)	444 (460) mm
Cabinet width	560 mm
Cabinet depth	550 (550) mm
Height of the front of the appliance	455 mm
Height of the back of the appliance	440 mm
Width of the front of the appliance	595 mm
Width of the back of the appliance	559 mm
Depth of the appliance	567 mm
Built in depth of the appliance	546 mm
Depth with open door	882 mm
Ventilation opening minimum size. Opening placed on the bottom rear side	560x20 mm
Mains supply cable length. Cable is placed in the right corner of the back side	1500 mm
Mounting screws	3.5x25 mm

2.2 Electrical connection

Risk of fire and electric shock.

- All electrical connections should be made by a qualified electrician.
- The appliance must be earthed.
- Make sure that the parameters on the rating plate are compatible with the electrical ratings of the mains power supply.
- Always use a correctly installed shockproof socket.
- Do not use multi-plug adapters and extension cables.
- Make sure not to cause damage to the mains plug and to the mains cable. Should the mains cable need to be replaced, this must be carried out by our Authorised Service Centre.
- Do not let mains cables touch or come near the appliance door or the niche below the appliance, especially when it operates or the door is hot.
- The shock protection of live and insulated parts must be fastened in such a way that it cannot be removed without tools.
- Connect the mains plug to the mains socket only at the end of the installation. Make sure that there is access to the mains plug after the installation.
- · If the mains socket is loose, do not connect the mains plug.
- Do not pull the mains cable to disconnect the appliance. Always pull the mains plug.
- Use only correct isolation devices: line protecting cut-outs, fuses (screw type fuses removed from the holder), earth leakage trips and contactors.
- The electrical installation must have an isolation device which lets you disconnect the appliance from the mains at all poles. The isolation device must have a contact opening width of minimum 3 mm.
- This appliance is supplied only with a main cable.

2.3 Use

Risk of injury, burns and electric shock or explosion.

- This appliance is for household use only.
- Do not change the specification of this appliance.
- Make sure that the ventilation openings are not blocked.
- Do not let the appliance stay unattended during operation.
- Deactivate the appliance after each use.
- Be careful when you open the appliance door while the appliance is in operation. Hot air can release.
- Do not operate the appliance with wet hands or when it has contact with water.
- Do not apply pressure on the open door.
- Do not use the appliance as a work surface or as a storage surface.
- Open the appliance door carefully. The use of ingredients with alcohol can cause a mixture of alcohol and air.
- Do not let sparks or open flames to come in contact with the appliance when you open the door.
- Do not put flammable products or items that are wet with flammable products in, near or on the appliance.

- Do not share your Wi-Fi password.
- Do not use microwave function to preheat the oven.

Risk of damage to the appliance.

- To prevent damage or discoloration to the enamel:
 - do not put aluminium foil directly on the bottom of cavity of the appliance.
 - do not put water directly into the hot appliance.
 - do not keep moist dishes and food in the appliance after you finish the cooking.
 - be careful when you remove or install the accessories.
- Discoloration of the enamel or stainless steel has no effect on the performance of the appliance.
- Use a deep pan for moist cakes. Fruit juices cause stains that can be permanent.
- This appliance is for cooking purposes only. It must not be used for other purposes, for example room heating.
- Always cook with the oven door closed.
- If the appliance is installed behind a furniture panel (e.g. a door) make sure the door is never closed when the appliance operates. Heat and moisture can build up behind a closed furniture panel and cause subsequent damage to the appliance, the housing unit or the floor. Do not close the furniture panel until the appliance has cooled down completely after use.

2.4 Care and cleaning

Risk of injury, fire, or damage to the appliance.

- Before maintenance, deactivate the appliance and disconnect the mains plug from the mains socket.
- Make sure the appliance is cold. There is the risk that the glass panels can break.
- Replace immediately the door glass panels when they are damaged. Contact the Authorised Service Centre.
- · Be careful when you remove the door from the appliance. The door is heavy!
- Make sure the cavity and the door are wiped dry after each use. Steam produced during the operation of the appliance condensates on cavity walls and can cause corrosion.
- Clean regularly the appliance to prevent the deterioration of the surface material.
- Fat and food remaining in the appliance can cause fire and electric arcing when the microwave function operates.
- Clean the appliance with a moist soft cloth. Use only neutral detergents. Do not use abrasive products, abrasive cleaning pads, solvents or metal objects.
- · If you use an oven spray, follow the safety instructions on its packaging.

2.5 Internal lighting

Risk of electric shock.

• Concerning the lamp(s) inside this product and spare part lamps sold separately: These lamps are intended to withstand extreme physical conditions in household appliances, such as temperature, vibration, humidity, or are intended to signal information about the

operational status of the appliance. They are not intended to be used in other applications and are not suitable for household room illumination.

· Use only lamps with the same specifications.

2.6 Service

- To repair the appliance contact the Authorised Service Centre.
- Use original spare parts only.

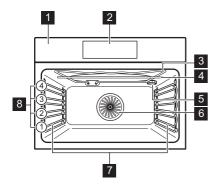

2.7 Disposal

Risk of injury or suffocation.

- · Disconnect the appliance from the mains supply.
- · Cut off the mains electrical cable close to the appliance and dispose of it.
- · Remove the door catch to prevent children or pets from becoming trapped in the appliance.

A WARNING!

Refer to Safety chapters.

6.1 How to set: Heating functions

Step 1	Remove all accessories and turn on the oven.	
Step 2	Press the symbol of the heating function to enter the submenu.	
Step 3	Select the heating function and press: $OK. \label{eq:obs}$ The display shows: temperature / microwave power.	
Step 4	Set: temperature / microwave power. Press: OK.	
Step 5	Press: START .	
STOP - pre	STOP - press to turn off the heating function.	
Step 6	Turn off the oven.	

The maximum time of microwave functions depends on microwave power you set:

MICROWAVE POWER	MAXIMUM TIME
100 - 600 W	90 minutes
More than 600 W	7 minutes

Take a shortcut!

6.2 How to use: Microwave quick start

Step 1	Press and hold: $igodot$. The microwave runs for 30 s.	
Step 2	To extend the cooking time:	
	Press on the running time value to go to the time settings. Set the cooking time.	Press +30 s .

The microwave can be switched on at any time with: Microwave quick start.

6.3 How to set: Assisted cooking

Every dish in this submenu has a recommended function and temperature. You can adjust the time and the temperature.

For some of the dishes you can also cook with:

Weight Automatic

Step 1	Turn on the oven.
Step 2	Press: 🗮.
Step 3	Press: X. Enter: Assisted cooking.
Step 4	Choose a dish or a food type.
Step 5	Press: START .

Take a shortcut!

6.4 Heating functions

Standard heating functions

Heating function	Application
Grill	To grill thin pieces of food and to toast bread.
Turbo Grilling	To roast large meat joints or poultry with bones on one shelf position. To make gratins and to brown.
True Fan Cooking	To bake on up to two shelf positions at the same time and to dry food. Set the temperature 20 - 40 °C lower than for Conventional Cooking.

Heating function	Application
Frozen Foods	To make convenience food (e.g., french fries, potato wedges or spring rolls) crispy.
Conventional Cooking	To bake and roast food on one shelf position.
() Pizza Function	To bake pizza. To make intensive browning and a crispy bottom.
Bottom Heat	To bake cakes with crispy bottom and to preserve food.

Special heating functions

Heating function	Application
Preserving	To preserve vegetables (e.g., pickles).
<pre></pre>	To dry sliced fruit, vegetables and mushrooms.
بین درمی Plate Warming	To preheat plates for serving.
↑ Dough Proving	To speed up the rising of the yeast dough. It prevents dough surface from drying and keeps the dough elastic.
<u>میں</u> Au Gratin	For dishes such as lasagna or potato gratin. To make gratins and to brown.

Heating function	Application
↓°C Slow Cooking	To prepare tender, succulent roasts.
<u>5</u> Keep Warm	To keep food warm.
Bread Baking	Use this function to prepare bread and bread rolls with a very good pro- fessional-like result in terms of crispiness, colour and crust gloss.

Microwave heating functions

Heating function	Application
Microwave	To heat and cook food. The microwave power range is from 100 - 1000 W.
Defrost	To defrost meat, fish, fruit, cakes, bread and butter. Power range is 100 - 200 W.
Reheat	To heat pre-prepared meals and delicate food. Power range is 300 - 700 W.
SSS Liquid	To heat drinks and soups. Power range is 800 - 1000 W.
True Fan Cooking + MW	To bake on one shelf position. The function with MW boost.
Conventional Cooking + MW	To bake and roast food on one shelf position. The function with MW boost.

Heating function	Application
Grill + MW	To cook food in a short time and to brown it. The function with MW boost.
Turbo Grilling +	To roast large pieces of meat on one level. To make gratins and to brown. The function with MW boost.

7. CLOCK FUNCTIONS

7.1 Clock functions description

Clock function	Application
Cooking time	To set the length of cooking. Maximum is 23 h 59 min. Maximum for combined functions (microwave + standard) is 119 min 59 sec.
End action	To set what happens when the timer ends counting.
Delayed start	To postpone the start and / or end of cooking.
Time extension	To extend cooking time.
Reminder	To set a countdown. Maximum is 23 h 59 min. This function has no effect on the operation of the oven.

End action and Delayed start are not available for microwave functions.

Step 6	Choose the value.			
Step 7	Press: OK. Repeat the action until the display shows the main screen.			

How to extend cooking time

When 10% of cooking time is left and the food seems not to be ready, you can extend cooking time. You can also change the heating function.

Press +1min to extend the cooking time.

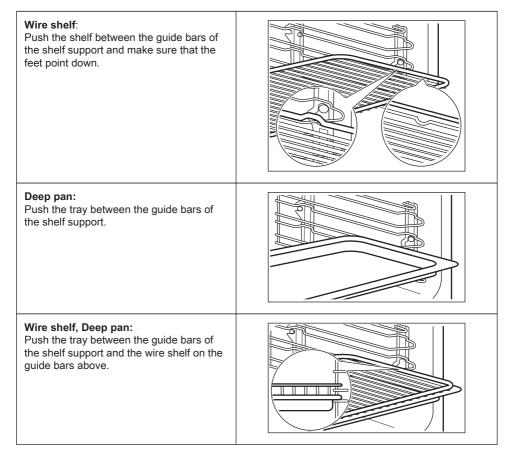

How to change timer settings			
Step 1	Press: (5).		
Step 2	Set the timer value.		
Step 3	Press: OK.		
You can change the set time during cooking at any time.			

8. HOW TO USE: ACCESSORIES

8.1 Inserting accessories

Use only suitable cookware and material. Refer to "Hints and tips" chapter, Microwave suitable cookware and materials.

A small indentation at the top increases safety. The indentations are also anti-tip devices. The high rim around the shelf prevents cookware from slipping of the shelf.

9. ADDITIONAL FUNCTIONS

9.1 How to save: Favourites

You can save your favourite settings, such as the heating function, the cooking time, the temperature or the cleaning function. You can save 3 favourite settings.

Step 1	Turn on the oven.			
Step 2	Select the preferred setting.			
Step 3	Press: . Select: Favourites.			
Step 4	Select: Save current settings.			
Step 5	Press + to add the setting to the list of: Favourites. Press OK.			
 > - press to reset the setting. • press to cancel the setting. 				

9.2 Function lock

This function prevents an accidental change of the heating function.

Step 1	rn on the oven.		
Step 2	Set a heating function.		
Step 3	$$, \blacksquare - press at the same time to turn on the function.		
To turn off the function repeat step 3.			

9.3 Automatic switch-off

For safety reasons the oven turns off after some time, if a heating function works and you do not change any settings.

(°C)	(
30 - 115	12.5		
120 - 195	8.5		
200 - 230	5.5		

The Automatic switch-off does not work with the functions: Light, End time, Slow Cooking.

9.4 Cooling fan

When the oven operates, the cooling fan turns on automatically to keep the surfaces of the oven cool. If you turn off the oven, the cooling fan can continue to operate until the oven cools down.

10. HINTS AND TIPS

Refer to Safety chapters.

10.1 Cooking recommendations

i

The temperature and cooking times in the tables are guidelines only. They depend on the recipes and the quality and quantity of the ingredients used.

Your oven may bake or roast differently to the oven you had before. The tables below show recommended settings for temperature, cooking time and shelf position for specific types of the food. If you cannot find the settings for a special recipe, look for the similar one.

For more cooking recommendations refer to cooking tables on our website. To find the Cooking Hints check the PNC number on the rating plate on the front frame of the oven cavity.

10.2 Microwave recommendations

(i) Let's cook!

Place the food on a plate on the bottom of the cavity.

Turn or stir the food halfway through the defrosting and cooking time.

Stir liquid dishes from time to time.

Stir the food before serving.

Cover the food for cooking and reheating.

Put the spoon to the bottle or glass when heating drinks to ensure better heat distribution.

Put the food into the oven without packaging. The packaged ready meals can be put into the oven only when the packaging is microwave safe (check information on the packaging).

Microwave cooking	Microwave defrosting
Cook food covered. If you want to keep a crust cook food without a cover. Do not overcook the dishes by setting the pow- er and time too high. The food can dry out, burn or cause fire. Do not use the oven to cook eggs or snails in their shells, because they can burst. Pierce the yolk of fried egg before reheating it. Pierce food with skin or peel several times be- fore cooking. Cut vegetables into similar-sized pieces. After you turn off the oven, take the food out and let it stand for a few minutes.	Put the frozen, unwrapped food on a small up- turned plate with a container below it, or on a defrosting rack or plastic sieve so that the de- frosting liquid can leak out. Remove defrosted pieces subsequently. To cook fruit and vegetables without defrosting them first, you can use a higher microwave power.

10.3 Microwave suitable cookware and materials

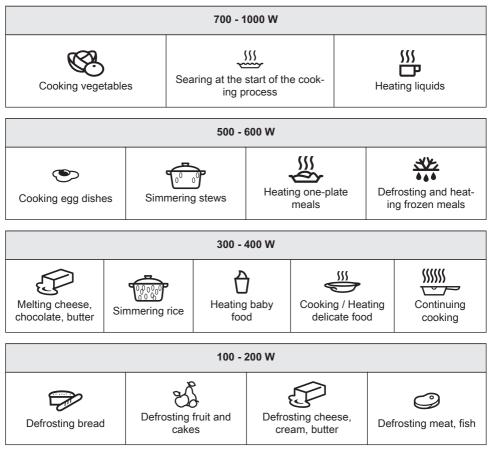

For the microwave use only suitable cookware and materials. Use below table as a reference. Check the cookware / material specification before use.

Cookware / Material	***		
Ovenproof glass and porcelain with no metal components, e.g. heat-proof glass	\checkmark	✓	\checkmark
Non-ovenproof glass and porce- lain without any silver, gold, plat- inum or other metal decorations	\checkmark	x	x

Chicken, 1.1 kg	Turbo Grill- ing + MW	400	230	1	35 - 40	Put the meat in round glass con- tainer and turn it upside down half- way through the cooking time.

11. CARE AND CLEANING

Refer to Safety chapters.

11.1 Notes on cleaning

Cleaning Agents	Clean the front of the oven with a soft cloth with warm water and a mild deter- gent.
	Use a cleaning solution to clean metal surfaces.
	Clean stains with a mild detergent.

warm water and a mild detergent. Do not clean the accessories in a dishwasher. Do not clean the non-stick accessories using abrasive cleaner or sharp-edged Accessories objects.

11.2 How to remove: Shelf supports

Remove the shelf supports to clean the oven.

Step 1	Turn off the oven and wait until it is cold.	
Step 2	Carefully pull the shelf supports up and out of the front catch.	
Step 3	Pull the front end of the shelf support away from the side wall.	
Step 4	Pull the supports out of the rear catch.	
Install the shelf supports in the opposite sequence.		

11.3 How to replace: Lamp

Risk of electric shock. The lamp can be hot.

Always hold the halogen lamp with a cloth to prevent grease residue from burning on the lamp.

Before you replace the lamp:		
Step 1	Step 2	Step 3
Turn off the oven. Wait until the oven is cold.	Disconnect the oven from the mains.	Put a cloth on the bottom of the cavity.

Top lamp

Step 1	Turn the glass cover to remove it.	
Step 2	Clean the glass cover.	
Step 3	Replace the lamp with a suitable 300 °C heat-resistant lamp.	
Step 4	Install the glass cover.	

12. TROUBLESHOOTING

Refer to Safety chapters.

12.1 What to do if...

The oven does not turn on or does not heat up		
Possible cause	Remedy	
The oven is not connected to an electrical supply or it is connected incorrectly.	Check if the oven is correctly connected to the electrical supply.	
The clock is not set.	Set the clock, for details refer to "Clock Func- tions" chapter, How to set: Clock functions.	
The door is not closed correctly.	Fully close the door.	
The fuse is blown.	Make sure the fuse is the cause of the prob- lem. If the problem recurs, contact a qualified electrician.	
The oven Child Lock is on.	Refer to "Menu" chapter, Submenu for: Op- tions.	

Components need to be replaced		
Description	Remedy	
The lamp is burnt out.	Replace the lamp, for details refer to "Care and Cleaning" chapter, How to replace: Lamp.	

Problems with Wi-Fi signal		
Possible cause	Remedy	
Trouble with wireless network signal.	Check your wireless network and router. Restart the router.	

Problems with Wi-Fi signal		
Possible cause	Remedy	
New router installed or router configuration changed.	To configure oven and mobile device again, re- fer to "Before first use" chapter, Wireless con- nection.	
The wireless network signal is weak.	Move router as close to the oven as possible.	
The wireless signal is disrupted by a micro- wave appliance placed near the oven.	Turn off the microwave appliance.	

12.2 How to manage: Error codes

When the software error occurs, the display shows error message. In this section, you will find the list of the problems that you can handle on your own.

Code and description	Remedy
F240, F439 - the touch fields on the display do not work properly.	Clean the surface of the display. Make sure there is no dirt on the touch fields.
F601 - there is a problem with Wi-Fi signal.	Check your network connection. Refer to "Be- fore first use" chapter, Wireless connection.
F604 - the first connection to Wi-Fi failed.	Turn the oven off and on and try again. Refer to "Before first use" chapter, Wireless connection.
F908 - the oven system cannot connect with the control panel.	Turn the oven off and on.

When one of these error messages continues to appear on the display, it means a faulty subsystem may have been disabled. In such a case contact your dealer or an Authorized Service Centre. If one of these errors occurs, the rest of the oven functions will continue to work as usually.

Code and description	Remedy
F131 - the temperature of magnetron sensor is too high.	Turn the oven off and wait until it cools down. Turn the oven on again.

Code and description	Remedy
F602, F603 - Wi-Fi is not available.	Turn the oven off and on.

12.3 Service data

If you cannot find a solution to the problem yourself, contact your dealer or an Authorised Service Centre.

The necessary data for the service centre is on the rating plate. The rating plate is on the front frame of the oven cavity. Do not remove the rating plate from the oven cavity.

We recommend that you write the data here:			
Model (MOD.)			
Product number (PNC)			
Serial number (S.N.)			

13. ENERGY EFFICIENCY

13.1 Energy saving

Y

The oven has features which help you save energy during everyday cooking.

Make sure that the oven door is closed when the oven operates. Do not open the oven door too often during cooking. Keep the door gasket clean and make sure it is well fixed in its position. Use metal cookware to improve energy saving (only when you use a non-microwave function). When possible, do not preheat the oven before cooking.

Keep breaks between baking as short as possible when you prepare a few dishes at one time. **Cooking with fan**

When possible, use the cooking functions with fan to save energy.

Residual heat

If a programme with the Duration or End Time selection is activated and the cooking time is longer than 30 min, the heating elements automatically turn off earlier in some oven functions. The fan and lamp continue to operate. When you turn off the oven, the display shows the residual heat. You can use that heat to keep the food warm.

When the cooking duration is longer than 30 min, reduce the oven temperature to minimum 3 - 10 min before the end of cooking. The residual heat inside the oven will continue to cook. Use the residual heat to warm up other dishes.

Keep food warm

Choose the lowest possible temperature setting to use residual heat and keep a meal warm. The residual heat indicator or temperature appears on the display.

Cooking with the lamp off

Turn off the lamp during cooking. Turn it on only when you need it.

14. MENU STRUCTURE

14.1 Menu

Press to open Menu.

Menu item		Application	
Assisted cooking		Lists automatic programmes.	
Favourites		Lists the favourite settings.	
Options		To set the oven configuration.	
Settings	Connections	To set the network configuration.	
Setup		To set the oven configuration.	
Service		Shows the software version and con- figuration.	

14.2 Submenu for: Options

Submenu	Application	
Light	Turns the lamp on and off.	
Child lock	Prevents accidental activation of the oven. When the option is on, the text "Child Lock" appears on the display when you turn on the oven. To enable the oven use, choose the code letters in the alphabetical order.	
Fast heat up	Shortens heat up time. It is available only for some of the oven functions.	
Time indication	Turns the clock on and off.	
Digital clock style	Changes the format of the displayed time indication.	

14.3 Submenu for: Connections

Submenu	Description
Wi-Fi	To enable and disable: Wi-Fi.

Submenu	Description
Remote operation	To enable and disable remote control. Option visible only after you turn on: Wi-Fi.
Auto remote operation	To start remote operation automatically after pressing START. Option visible only after you turn on: Wi-Fi.
Network	To check network status and the signal power of: Wi-Fi.
Forget network	To disable current network from auto connection with the oven.

14.4 Submenu for: Setup

Submenu	Description
Language	Sets the oven language.
Display brightness	Sets the display brightness.
Key tones	Turns the tone of the touch fields on and off. It is not possible to mute the tone for: \bigcirc .
Buzzer volume	Sets the volume of key tones and signals.
Time of day	Sets the current time and date.

14.5 Submenu for: Service

Submenu	Description	
Demo mode	Activation / deactivation code: 2468	
Software version	Information about software version.	
Reset all settings	Restores factory settings.	

15. IT'S EASY!

Before first use you have to set:				
Language Display bright- ness Key tones Buzzer volume Time of day				
Familiarize yourself with the basic icons on the control panel and the display:				

		-	•		
()	Menu	☆	()	START /
On / Off		Favourites	Wi-Fi	Timer	STOP

Start using the oven				
Quick start	start Turn on the oven and start cooking with the default tempera- ture and time of the function.	Step 1	Step 2	Step 3
		Press and hold: ①.	the preferred function.	Press: START .
Quick Off	Turn off the oven, any screen or mes- sage at any time.	① - press and hold until the oven turns off.		
MW quick start	Start Microwave at any time with default settings: 30 sec / 1000W.	Press: ①.		

Start cooking				
Step 1	Step 1 Step 2 Step 3		Step 4	Step 5
press to turn on the oven.	- select the heat- ing function.	°C - set the temper- ature.	OK - press to con- firm.	START - press to start cooking.

Get to know how to cook quickly

Use the automatic programmes to prepare a dish quickly with the default settings:

Get to know how to cook quickly					
Assisted cooking	Step 1	Step 2	Step 3	Step 4	
	Press: ①.	Press: 📕.	Press: X Assis- ted cooking.	Choose the dish.	

Use quick functions to set the cooking time				
10% Finish assist Use 10% Finish assist to add extra time when 10% of the cooking time is left.	To extend the cooking time press +1min .			

16. TAKE A SHORTCUT!

Here you can see all the useful shortcuts. You can also find them in the dedicated chapters in the user manual.

Wireless connection

How to set: Heating functions

How to set: Assisted cooking

How to set: Cooking time

How to delay: Start and end of cooking

How to cancel: Set Timer

17. ENVIRONMENTAL CONCERNS

Recycle materials with the symbol \mathcal{C} . Put the packaging in relevant containers to recycle it. Help protect the environment and human health by recycling waste of electrical and electronic

appliances. Do not dispose of appliances marked with the symbol $\underline{\mathbb{A}}$ with the household waste. Return the product to your local recycling facility or contact your municipal office.
