

DIFABCR

Dishwashers, 50's Style , Under counter built-in, 60 cm, Number of place settings: 13, Cream, B

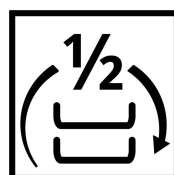

DELAY TIMER

A delay timer can be set to run the programme at a convenient time or to take advantage of off-peak energy periods.

DRY ASSIST

At the end of the drying cycle a special device automatically opens the door a few centimeters to ensure perfect drying. This can save up to 20% of energy compared to Class A, by automatically opening the door there is less need for the heater element to continue to get the desired drying result.

HALF LOAD FLEXIZONE

The 1/2 load Flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items have to be placed.

AQUASTOP

Most Smeg dishwashers have Total acquastop, an electronic device fitted to the water intake hose and the base of the machine, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately directly from the source when necessary, preventing water spillages onto the floor.

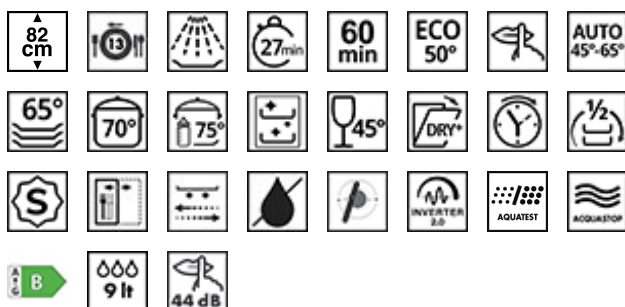

EXPRESS 27' PROGRAM

Designed especially for lightly soiled dishes to be washed immediately after use, the quick program washes in just 27 minutes.

SILENT PROGRAM

The hydraulic system, the shape of the bottom of the chamber and the use of increasingly high-performance motors means that the noise of the washing cycle is reduced by up to -2 dB when this program is selected.
